## Experience

---

### Software Engineer

#### Decskill

Lisbon, Portugal 08/2022 - Present

- Working at ANEPC (National Authority for Emergency and Civil Protection) helping to maintain and implement new features **in software that helps save lives in Portugal** using technologies like C#, .NET, SQL and JavaScript.
- Participated from the beginning until the deployment in production of one of the biggest changes in the ANEPC system that appeared in an [article on CNN Portugal](#).
- Designed and implemented scalable APIs to provide information about occurrences to ANEPC Mobile App.

### Software Engineer

#### MagniFinance

Lisbon, Portugal 03/2022 - 08/2022

- Helped people with their financial organization through modern and simple to use web software created with technologies like C#, .NET, AngularJS, SignalR, **Git, XUnit and Azure**.
- Created a standard software class template and code snippets **to help me and my colleagues gain productivity** and have some things repeated in constant time.
- Designed and created the MagniFinance API documentation to help other software engineers consume the service.
- Participated in an agile team, doing **code reviews, pull requests, pipeline analysis and unit tests** as well.

### Content Producer (Freelancer)

#### Trybe

Brazil 02/2022 - 07/2022

- Responsible for creating the content of several lessons and knowledge units related to C# training in **one of the largest programming schools in Brazil** with thousands of students.

### Software Engineer

#### AKA Tecnologia

São Paulo, SP, Brazil 02/2020 - 03/2022

- Design and efficiently **implement end to end features for a web software** that optimized the process of generating safety documents for chemical products, Safetychem Software. Using technologies like C#, .NET, EF, AngularJS and SQL.
- Helped new software engineers in project integration.
- Faced a big challenge when I was assigned to design and implement the [Mobile Version of Safetychem](#) using Dart/Flutter and I was able to deliver with quality and on time.

### Software Engineer, Intern

#### DP World

Santos, SP, Brazil 07/2018 - 01/2020

- Started as a Vacation Internship, but the directors liked my profile and gave me the opportunity to continue.
- Used technologies like C#, .NET, JavaScript to solve problems in different software (external and internal) and where I got my problem solving skills.

## Education

---

### Bachelor of Information Systems

#### Paulista University (UNIP)

São Paulo, SP, Brazil 01/2017 - 12/2020

## Projects

---

- [Rumo ao Hexa](#): A Mobile App created using **Blazor Maui** for Brazilian fans to use at the World Cup 2022.
- [SpotBoard](#): **Spotify + Billboard**, a web application for users to generate their Billboard Hot 100 from their most played songs on Spotify.
- [Easy NIF](#): A **Google Chrome extension** to generate NIF (Portuguese TIN) in one click.

## Others

---

- **Honorable Mention**: Won a Honorable Mention at OBMEP (Brazilian Public School Mathematics Olympiad) in 2015.
